Chapter 1 – Introduction

What is the Infrastructure Funding Statement (IFS)?

1. The Infrastructure Funding Statement (IFS) provides a summary of Planning Obligations (often known as developer contributions) secured by the Council from new developments towards infrastructure, over a particular period. This statement is updated and published annually to reflect the summary of obligations and agreements for each monitoring period. The monitoring period runs from 1st April to 31st March. The IFS must be published by 31st December each year.
2. It has been produced following collaborative work with the Council's Accounts department and Kent County Council. Kent County Council are also required to produce their own Infrastructure Funding Statement which can be found on their website on the following link: [Kent County Council's IFS](#).

What are Planning Obligations?

3. Planning Obligations are legal agreements entered into with developers and landowners to mitigate the impacts of a development proposal. Planning obligations can be agreed to mitigate the impact of unacceptable development to make it acceptable in planning terms.
4. Planning obligations must meet the following legal tests if they are to constitute a reason to grant planning permission:
 - necessary to make the development acceptable in planning terms;
 - directly related to the development; and
 - fairly and reasonably related in scale and kind to the development.
5. Local authorities can, if appropriate, decide to set a Community Infrastructure Levy (CIL) for their area which is a fixed charge levied on new development to fund required infrastructure. Section 106 (S106) agreements are legal agreements between developers and the local council linked to planning permissions, and this is the system that Dover Council (the Council) uses to secure contributions.
6. CIL can be used alongside S106 agreements and planning conditions to seek contributions from developers for infrastructure. However, at the present time the Council doesn't operate CIL, or intend to implement CIL, so the Infrastructure Funding Statement (IFS) will be reporting on S106 agreements¹.

¹ This IFS may include contributions secured through other methods such as internal DDC transfers for sites delivered by DDC, or contributions secured through other developer obligation methods such as unilateral undertakings.

7. Further information on legislation governing planning obligations can be found on the government website on the following link: [Planning Obligations](#).

What should the Infrastructure Funding Statement contain?

8. The Community Infrastructure Levy (CIL) regulations (as amended on 01 September 2019) require Local Authorities to publish a statement at least once a year, that provides the following information:
 - 1) A statement of the infrastructure projects or types of infrastructure which the charging authority intends will be, or may be, wholly or partly funded by Community Infrastructure Levy (CIL).
 - 2) A report about CIL, in relation to the previous financial year, which includes matters specified within the regulations.
 - 3) A report about planning obligations, in relation to the reported year, which includes matters specified within the regulations. This is referred to as the “Section 106 Report”.
9. The relevant legislation requires the following to be reported in the Section 106 Report:
 - the total amount of money to be provided under any planning obligations which were entered into during the reported year;
 - the total amount of money under any planning obligations which was received during the reported year;
 - the total amount of money under any planning obligations which was received before the reported year which has not been allocated by the authority;
 - summary details of any non-monetary contributions to be provided under planning obligations which were entered into during the reported year, including details
 - in relation to affordable housing, the total number of units which will be provided;
 - in relation to educational facilities, the number of school places for pupils which will be provided, and the category of school at which they will be provided;
 - the total amount of money (received under any planning obligations) which was allocated but not spent during the reported year for funding infrastructure;
 - the total amount of money (received under any planning obligations) which was spent by the authority (including transferring it to another person to spend);
 - in relation to money (received under planning obligations) which was allocated by the authority but not spent during the reported year, summary details of the items of infrastructure on which the money has been allocated, and the amount of money allocated to each item;

- in relation to money (received under planning obligations) which was spent by the authority during the reported year (including transferring it to another person to spend), summary details of:
 - the items of infrastructure on which that money (received under planning obligations) was spent, and the amount spent on each item.
 - the amount of money (received under planning obligations) spent on repaying money borrowed, including any interest, with details of the items of infrastructure which that money was used to provide (wholly or in part).
 - the amount of money (received under planning obligations) spent in respect of monitoring (including reporting under regulation 121A) in relation to the delivery of planning obligations.
- the total amount of money (received under any planning obligations) during any year which was retained at the end of the reported year, and where any of the retained money has been allocated for the purposes of longer-term maintenance (“commuted sums”), also identify separately the total amount of commuted sums held.

The Structure of this IFS

The IFS provides information on:

- planning obligations within S106 agreements signed within the reporting year, which includes the nature and value of their financial contribution(s);
- details of S106 funding received by the council in the reporting year;
- details of S106 funding spent by the council in the reporting year;
- details of funding received before the monitoring year that is retained and whether it has been allocated or remains unallocated, and
- estimates of future S106 funding and future infrastructure projects and priorities.

10. This statement should be read in conjunction with the following CSV spreadsheets that are available on the Council’s website and produced in line with Government guidance:

[Note: links to spreadsheets CSV1-4 to be added later once they are live on the website]

- CSV1 New S106 agreements 2022-23²
- CSV2 Agreed Contributions 2022-23
- CSV3 Contribution transactions 2022-23
- CSV4 Future agreed provision 2022-23

² For submission to government these CSV files will be labelled as per government guidance as: CSV1 Developer-agreement-2022-23, CSV2 Developer-agreement-contribution-2022-23, CSV3 Developer-agreement-transaction-2022-23, CSV4 Developer-agreement-future-agreed-provision.

11. This Infrastructure Statement (IFS) covers the period **01 April 2022 to 31 March 2023**

What does ‘Allocated’ and ‘Unallocated’ mean?

12. As set out in the national guidance and for the purpose of this report, “allocated” means a decision has been made by the Council to commit funds to a specific item of infrastructure or project. For most Section 106 agreements, this decision has been made at the planning application stage with each infrastructure or project requirement specified within the legal agreement.

13. It is however important to note that “unallocated” money still sets out which infrastructure type it applies to and will still be bound by the terms of the Section 106 legal agreement and as a minimum will be required to be spent on the infrastructure type specified within the agreement, it is just that a specific project has not yet been decided.

14. Whilst this detail is summarised further within the spreadsheets that accompany this report, for the full details including limitations on spends, reference must always be made back to the individual Section 106 legal agreement which can be located on the Councils website through the Planning Application reference details.

Chapter 3 - S106 Funds Retained

21. This section sets out S106 funds which were received prior to the 2022-23 monitoring year that are yet to be spent and remain 'held' by the Council. As set out above in this report "allocated" means a decision has been made by the local authority to commit funds to an item of infrastructure or project and "unallocated" money still sets out which infrastructure 'type' it applies to, but a specific project has not yet been decided.

Table 3 - S106 Receipts Retained (Allocated and Unallocated)

<u>Unallocated</u>	<u>Amount</u>
Unallocated and unspent received before 2022-23 monitoring year	£3,297,839.94
Unallocated and received during 2022-23 monitoring year	£605,283.33
Total 'unallocated' balance end of 2022-23	£3,670,855.11
<u>Allocated</u>	<u>Amount</u>
Allocated and unspent that had been received before 2022-23 monitoring year	£3,743,862.88
Allocated and received during 2022-23 monitoring year	£127,972.53
Total 'allocated' balance end of 2022-23	£3,715,873.15

22. Table 4 below provides summary details of infrastructure with **allocated** S106 funding that has not yet been spent, this is for all funding held by the Council at 31 March 2023, irrespective of when it was collected.

Money Borrowed and Repaid

26. During 2022-23 reporting year no S106 funding was spent on repaying borrowed money.

Money Returned

27. The Council has not returned any S106 funding to developers during 2022-23 for a failure to perform obligations set out in any S106 agreement.

Chapter 5 - Future Spending Priorities

28. Government guidance states that Infrastructure Funding Statements should set out future spending priorities on infrastructure and affordable housing in line with up to date or emerging plan policies.

Local Plan Infrastructure requirements

29. The Council published the new [Local Plan](#) for the district (Regulation 19 Submission Version) in December 2022, which is now at Examination stage. Ensuring that the right infrastructure is provided in the right place, at the right time, to support the scale of growth identified in the Plan will be integral to its successful delivery.
30. The Local Plan includes Policy SP11 - Infrastructure and Developer Contributions. This policy will enable the Council to require new or enhanced infrastructure through Planning Obligations. This policy will apply to all major development proposals.
31. The need for Affordable housing is essential and the future requirements are set out in a separate Strategic Policy in the Local Plan, Policy SP5. This sets out a requirement that 30% of housing in new developments must be affordable housing, with the exception of the existing Dover Urban Area, where viability work has concluded that it is not economically viable to provide affordable housing.
32. Strategic Transport improvements are also a key infrastructure priority for the district. The Local Plan contains Policy SP12 - Strategic Transport Infrastructure, which covers the Highway Network, and Bus and Rail infrastructure. The policy specifically covers the Strategic Highway network improvements needed at Whitfield and Duke of York Roundabouts and other A2 strategic junctions. In addition, it supports the longer-term improvements proposed by National Highways to implement the A2 Dover Access Project. With regards to rail and bus infrastructure, the policy supports the reduced journey time proposals for HS1, the continued delivery of the Dover Fastrack bus service and other local bus service provision.
33. In addition, the Local Plan includes Development Management policies which set out how some of the more local infrastructure requirements set out in Policy SP11 should be provided / calculated to meet the needs of new development. These include policies for Providing Open Space, Sports Provision and Community Facilities and Services, and several in relation to local transport and active travel.

Infrastructure Delivery Plan (IDP)

34. The Local Plan is supported by a number of [background documents](#), some of which include an audit of current infrastructure provision and highlights the future needs for certain types of infrastructure across the district. For site specific allocations within the Local Plan, the priority for Infrastructure is set out in the policy wording. This is all then detailed within the Infrastructure Delivery Plan (the IDP).
35. The IDP identifies specific infrastructure needs for the District over the plan period, covering all types of infrastructure services such as education, health, community, sports and open spaces, transport, water and other utilities which relate to Policy SP11. It sets out the priority of the infrastructure and expected delivery methods where this is known. It also includes detail of already planned infrastructure improvements / projects and how and when it will be delivered. The latest version (July 2023) of the IDP and appendices can be viewed here:
- [Infrastructure Delivery Plan - V3 July 2023 \(doverdistrictlocalplan.co.uk\)](#)
 - [Appendices to IDP V3 July 2023 \(doverdistrictlocalplan.co.uk\)](#)

Priorities for Section 106 spending

36. At the end of the reporting year March 2023, a significant amount of unallocated funding held by the Council relates to affordable housing provision, with just under £2.3 Million available funding for this purpose. Allocating this funding to appropriate affordable housing projects within the district remains a spending priority for the council.
37. The level and timing of S106 funding received will depend on the nature and scale of the developments that come forward, the number of implemented planning permissions, build-out rates, and the phasing of development etc. Future versions of this IFS will report on short and medium-term priorities for S106 expenditure as set out in the most up to date IDP (see above).

Chapter 6 - Estimated Future Income from signed S106 agreements.

38. Whilst it is difficult to predict what future S106 income might look like due to a number of uncertainties around site delivery, the Council is able to examine the current levels of infrastructure provision in existing S106 agreements that are yet to be realised. This section provides a picture of how much funding could be received from developer contributions (S106 agreements) if everything that has been agreed in currently signed S106 agreements is paid at the amounts listed (note many financial contributions are subject to indexation so figures are likely to increase as they are collected in future years).
39. Table 7 provides this estimated future infrastructure figure by broad infrastructure type. This figure has been calculated by adding up all the pending S106 payments that have been agreed but not yet triggered, up to 31st March 2023.
40. Note that this table does not include a duplicate of new signed agreements and contributions in the 2022-23 monitoring year to avoid duplication but when added together create a 'best estimate' of total future income expected through S106 developer obligations.
41. The anticipated payment terms have been estimated based on the current status of the development, for example whether the site has full consent or is under construction, and the 'trigger points' set out for payment terms in the S106 agreement i.e., 'prior to commencement', 'upon completion of 50 dwellings' or 'upon occupation of all dwellings'. Where there are several trigger points for compliance with a S106 agreement, one S106 infrastructure requirement could be split over more than one payment term.
42. The total estimated future income figure is **£15,547,880.25**. Further details of the developments providing the estimated S106 contributions listed in Table 7 can be found in CSV4 [\[link to CSV4 Spreadsheet added at publication\]](#).

⁵ Education contributions are comprised of Primary, Secondary and Adult education. For a detailed breakdown into these subsections please see CSV4 Future agreed contributions 2022-23.

⁶ Health and Social Care contributions are comprised of different subsections. For a detailed breakdown into these subsections please see CSV4 Future agreed contributions 2022-23.

⁷ Affordable Housing total contributions are difficult to estimate in all circumstances as many are granted under outline consents and the full details of the requirement that will be required as part of the Reserved Matters/Full applications are unknown. Most Affordable Housing provision is required as on-site delivery rather than off-site contribution so actual Affordable Housing delivery is higher than financial contributions alone.

Infrastructure Type	Anticipated Payment Term			Total future provision

⁸ Open Space contributions are comprised of 3 subsections: Allotments, mixed use, and parks. For a detailed breakdown into these subsections please see CSV4 Future agreed contributions 2022-23.

⁹ Note that some open space provisions are unknown, in particular for Whitfield Urban Expansion which are to be agreed at each phase of development and most Open Space is provided on site, not as an off-site financial contribution.

¹⁰ Sustainable Travel contributions are comprised of 2 subsections: Travel plan and Bus Service For a detailed breakdown into these subsections please see CSV4 Future agreed contributions 2022-23.

¹¹ There is 1 Outline application where the financial contributions are yet to be decided by the reserved matters applications - DOV/14/00058. There are other contributions where there are more than one payment term and are unable to split in the short/medium/long so total calculations in payment terms will not add to full total in the final cell.

Appendix 1 - Major Sites Specific S106 Requirements

This appendix looks at major / strategic sites, to highlight agreed S106 funding and identify specific infrastructure requirements for these important sites. The figures contained in this section of the report are included in the main body of the IFS, but it is important that information about strategic sites can be looked at in isolation from the rest of the district to effectively monitor the delivery of infrastructure at these locations.

The tables on the following pages list the S106 provision for the 2 current major developments at Aylesham Village Expansion and Whitfield Urban Expansion in more detail, providing details of:

- Funding held by the council for the development detailing what infrastructure projects it will help to deliver.
- Future S106 provision that has yet to be collected or triggered and details of the infrastructure this will provide; and
- Expenditure of S106 funding with details of the infrastructure it has delivered.
