| <p>Brief Details of Item: (Please provide information about the contents of this item and the reason for decision.)</p> <p>Initial feasibility work has been undertaken to consider a crematorium project with the option to provide additional cemetery capacity to help address lack of burial space in the Dover urban area. It is proposed to undertake a district-wide site appraisal to find the preferred and most suitable location in the district. Simultaneously, officers are seeking approval to take the necessary steps to procure the preferred location. This report is being prepared to ask Members to note the historic work undertaken to date and to decide whether and how the project should progress to the next stage of development or otherwise.</p> | | | |
| <p>Deadline for Item: (Please indicate the date and whether this is statutory, operational or to meet the requirements of another agency.)</p> <p>Initial feasibility studies have indicated the need and demand for a crematorium to serve the needs of Dover District. The district has a growing shortage of burial provision in the Dover urban area with approximately 80% of people now choosing cremation. With pressures on land supply and source protection zones, additional burial and cremation capacity is needed to enable this statutory service to be maintained. A decision is required to agree whether and how the project should progress into the next stages of development.</p> | | | |
